

How to install BobMarks LITE for Netscape Navigator

(To print this page out, hit <Ctrl>P)

You can unzip the *bobmrknt.zip* file anywhere on your hard drive, but we recommend that you select the "C:\Windows\Temp" folder as the destination for the files it contains, including *BobMarkstrial.htm*.

Next, run Netscape and open Netscape's Bookmark Window by holding down <Ctrl>B.

In the Bookmark Window, select **File>Import**, navigate to your "C:\Windows\Temp" folder, and choose *BobMarkstrial.htm* to import into your existing bookmark file.

(Alternatively, select **File>Open** to make **BobMarks** your new bookmark file if you like.)

That's it! You're done! Close Netscape's Bookmark Window and take a look: your **BobMarks** are ready!

Enjoy! And thanks!
